## RISK AND REWARD PROFILE

The Fund is placed in risk category 5 as calculated using the formula recommended by the European Securities and Markets Authority. The formula is based on historical data, which may not be a reliable indication of future risk. The risk category might change in the future.

The most significant risk for the Fund is the market risk of the US and the Canadian equity markets. The Fund's investments are not currency hedged, and thus bear an exchange rate risk.

The Fund may engage in securities lending for additional income. The shares lent are secured by bonds or money to protect against counterparty risk related to securities lending.

The lowest category does not mean 'risk free', as all investments include risks. Further information about the general risks related to investments can be found on page 5 of the Seligson & Co Fund Prospectus (available in Finnish and Swedish).
