PHOENIX FUND

UNIT SERIES K, UNIT TYPES A and B

ISIN Codes FI4000019831 (A / acc) and FI4000019823 (B / income)

The Fund is managed by Seligson & Co Fund Management Company Plc.

OBJECTIVES AND INVESTMENT POLICY

Phoenix is an equity fund investing globally in so called special situations. A special situation is a temporary event which affects the company's development and thus its share value. The Fund seeks to overperform its reference index in the long-term.

Fund type, date of inception	Actively managed equity fund (UCITS), launched on 25 September 2000. K unit's date of inception 22 June 2011.
Investment policy	Global equities.
Reference index	Morgan Stanley Capital International All Country World Net Dividend Return. The index is a total return index.
Subscriptions	Every Finnish banking day. If the subscription payment has been received at the Fund Management Company on a banking day, the subscription date and price are those of the following banking day.
Redemptions	Every Finnish banking day. If the redemption order has been received at the Fund Management Company before 16:00 Finnish time on a banking day, the redemption date and price are those of the following banking day, if the fund has liquidity. If funds to meet the redemption have to be raised by selling securities, the redemption is executed at latest at the unit price of the date that sales proceeds are entered into the Fund's value calculation.
Unit types and dividend distribution	The Fund carries both accumulation (A) and income (B) units. For accumulation (A) units, the investment returns (e.g., dividends) are reinvested following the Fund's investment policy. For income (B) units, a yield based on the dividends received by the Fund is distributed annually. However, the yield will be no less than 3% of the units value on the last day of the year.
Recommended minimum investment time	7 years. Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 7 years.

RISK AND REWARD PROFILE

The Fund is placed in risk category 5 as calculated using the formula recommended by the European Securities and Markets Authority. The formula is based on historical data, which may not be a reliable indication of future risk. The risk category might change in the future.

The most significant risk for the Fund is the market risk of the global equity markets. The share values of companies undergoing special situations may be more volatile than the general markets. Moreover, active portfolio management always bears a risk of unprofitable investment decisions being made by the portfolio manager. The Fund's investments that are in foreign currency are not currency hedged, and thus bear exchange rate risk.

The Fund may engage in securities lending for additional income. The shares lent are secured by bonds or money to protect against counterparty risk related to securities lending.

The lowest category does not mean 'risk free', as all investments include risks. Further information about the general risks related to investments can be found on page 5 of the Seligson & Co Fund Prospectus (available in Finnish and Swedish).
